SUMMARY

Passionate Full Stack Developer focused on building modern web, mobile and AI driven applications. I enjoy taking projects from idea to deployment, solving practical challenges by combining performant backends with intuitive user interfaces.

SKILLS

- Languages: TypeScript, JavaScript, Python, SQL Frontend & Mobile: React.js, Next.js, React Native, Expo
- Backend: Node.js, Hono, FastAPI
- Database & Tools: MySQL, Drizzle ORM, Turborepo, Webhook Integration, REST API
- AI & NLP: Natural Language Processing, FastText, Intent Classification
- Infrastructure: Linux (Ubuntu) System Administration, Server Management, Deployment

PROJECTS

- Architected an autonomous CRM assistant for service based businesses to handle high volume WhatsApp inquiries with zero latency.
- Developed a Python based FastText microservice (trained on 55,000 synthetic utterances) for intent classification.
- Built a fast backend using TypeScript and Hono, alongside a management dashboard using Next.js.
- Self hosted the entire multi tenant architecture on a custom Linux Ubuntu server.
- To view the full architecture, live demo, and my other projects, please visit my portfolio: isteat.com/selimcv

EDUCATION

European University of Lefke, Bachelor of Science in Information Systems and Technology | 2026

Experience

ASAT General Directorate | IT Intern June 2025 - July 2025

- Executed operating system deployments, advanced system configurations and provided on-site technical support for corporate hardware and software.
- Configured Local Area Network (LAN) environments and shared network directories to facilitate secure, seamless data access across the institution.
- Gained hands-on experience with enterprise level IT operations, cross departmental support workflows and corporate service management.
